

The background image of the top half of the slide shows two mining workers in the foreground, seen from behind. They are wearing white hard hats and high-visibility yellow safety vests with the FLSmidth logo. They are standing in front of a large, circular industrial structure, possibly a ball mill, in a vast, high-ceilinged industrial building with a complex steel framework. The lighting is industrial and somewhat dim.

FLSmidth Mining

– engineering, equipment & service solutions

Your full flowsheet provider for the best in sustainable productivity-enhancing mining equipment, technology and solutions.

From in-pit crushing and conveying to tailings management, you have access to a full flowsheet of productivity-enhancing mineral processing and material handling technology and equipment. Take advantage of digitalization and benefit from the

knowledge of our seasoned experts that work with you to discover new potential to make your mining operations more sustainable and efficient.
