Our team of experts

The best solutions for the mining industry

A combination of experience and personal service ensures that we offer our clients optimal solutions. We are proactive in handling of transports within the mining industry and for us an ongoing dialogue with the client is crucial. So are evaluating and analysing our client's needs as this enables us to offer the highest level of personal service.

With expert insights into the industry, Incoterms and planning of multiple transport solutions we are able to meet and exceed client's expectations.

Our team of experts

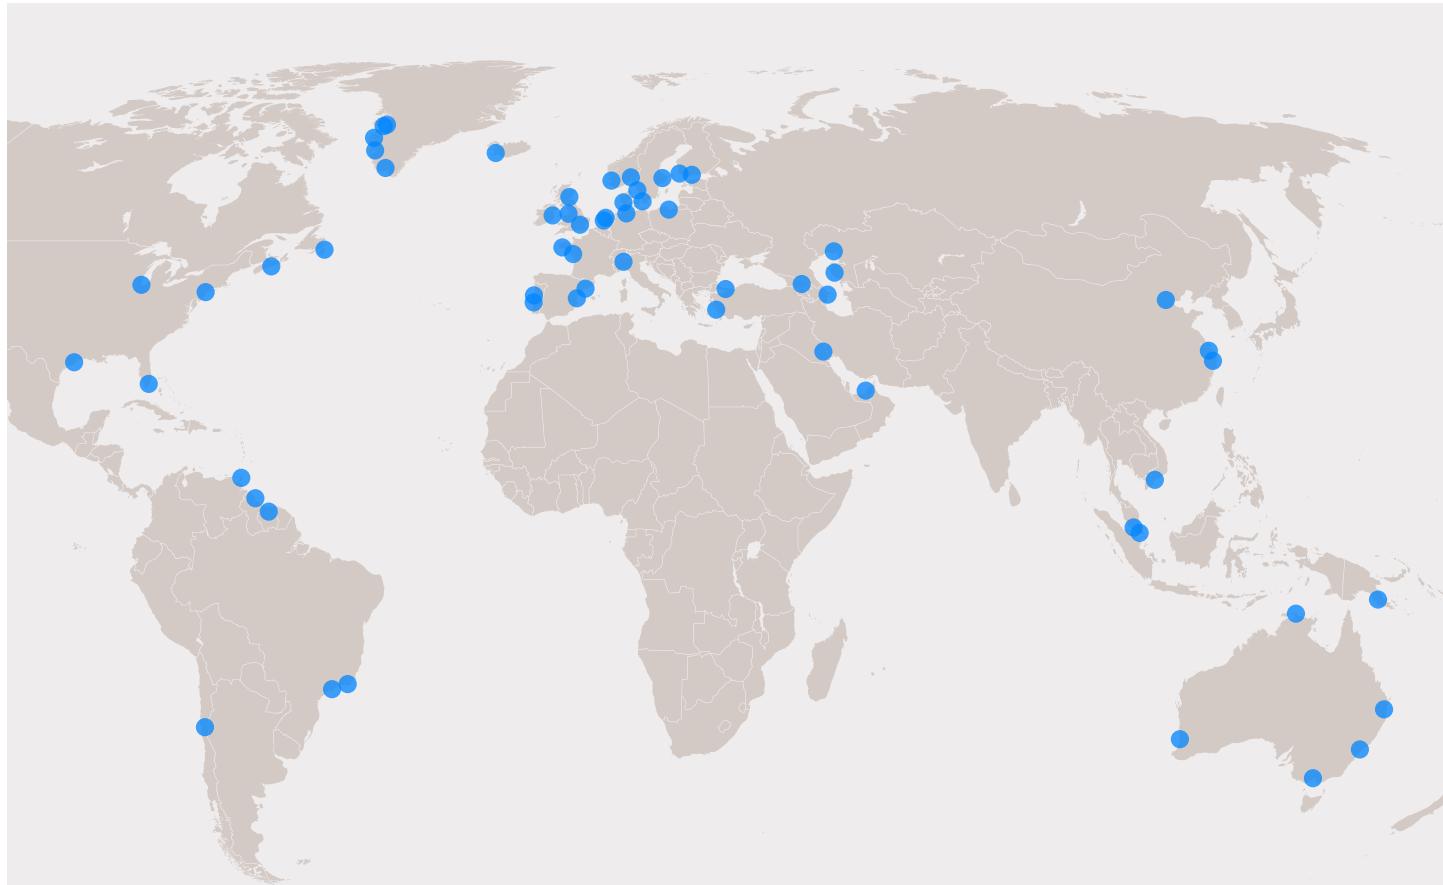

We provide full supplier coordination and value adding logistics to any project. Our team of experts has many years of experience in handling the transport of all types of mining equipment from projects in Greenland, Africa and South America etc.

Backed up by our network of more than 80 offices around the world, we can handle even the most challenging assignments.

Quality all the way

Our in-house specialists include a stevedoring department, port captains, naval architects, HSSEQ and compliance department as well as an IT department developing IT solutions tailored to the clients' needs. These teams of dedicated specialists ensure quality all the way.

More than 80 offices worldwide
